ABOUT THE CONFERENCE

“History is the version of past events that people have decided to agree upon.”

These words of Napoleon Bonaparte are important to be remembered as our history is scripted and defined by us. We, the people. We, the citizens. We, the children of this universe. Thus, let us work together to create a new her-and-his-story that is worth remembering without any disparity, deprivation, and degradation.

We, the Department of Economics and IQAC, Thakur College of Science & Commerce, intend to start this new conversation through this Conference. The Conference aptly titled **“National Multidisciplinary E-Conference on - The Rising Perspective to Sustainable & Creative Economy”** tries to find the new, innovative, sustainable, unseen, and unheard solutions for the problems around us.

From the age-old problems of hunger, poverty, or unemployment to newer problems like the COVID-19 pandemic, environmental degradation, or financial distress we need to learn to explore, discuss and deliberate on new scopes and perspectives to solving our problems.

The conference intends to take a holistic approach in identify and mending the problems. Let it be using bar-code to promote the education or use the mobile application for micro-managing loans or make a cost-effective paddy weeder. We have done it all. But this innovative, new thinking needs to reach out to larger audiences. Be it government intervention or Public-Private-Partnership or Social enterprises, we need to make this change for making our lives artistically, physically, economically, environmentally, politically, socially, scientifically, and metaphysically better.

Thus, we invite all the students, teachers, researchers, academicians, and everyone to join in for a new, improved, and innovative conversation on the problems which are surrounding us. It is not just about listing the problems but working towards identifying pragmatic solutions for the same.
